

# Unituff 452

## INFORMATION

**Item name:** Unituff 452

---

**Item code:** 04-U452/4 4L Tin  
04-U452/1G.UT 1 Gallon Tin (US)

---

**Description:**

- Unituff 452 Brush-on/Roll-on Strippable Protective Coating

## Specifications:

- A thick silver adhesive coating that creates a protective membrane when dried. It forms a tough coating that easily peels away when the protection is no longer required
- **Specifications:** Unituff 452 is a heavy duty impervious, strippable coating for mainly external applications. It acts as a membrane for protection against weather, staining acid and alkalis, water marking, scratching, paint and plaster
- **Use:** Compatible with Mild Steel, Carbon Steel or Aluminium
- Unituff 452 should be stirred well first and applied generously
- Apply at least 2-3 coats to the area to be protected
- Allow at least 5 minutes drying time between each coat
- Be aware the liquid is highly flammable, so take care with use
- It is advised to use in small quantities due to the fast drying properties of this product
- **Benefits: Peelable:** Easily peeled away when item is required again
  - **Durable:** Ideal for protecting metal items for long periods of time in extreme weather conditions
  - **Fast drying:** Saves time and the item is sealed immediately
    - **Non-seepage:** Provides the ultimate barrier for protection as no moisture will penetrate
    - Prevents rust creep
    - **Non-residue:** Minimal, if any, cleaning required of the metal item once the Unituff 452 has been peeled away

## APPLICATIONS
